

Rev 1 - Feb 23, 2009

Rev 2 - Feb 24, 2009 Thanks to Audiohub for corrections

Rev3 - Feb 24, 2009 Fix the R3 R4 layout & R9 value (thanks to audiohub again)

Naming convention is according to manufacturer

IC1 pin 8 to 9V and pin 4 to GND, replaced with TL092 for OCD

Input/Output wires are shielded

Resembles the Fulltone OCD and the Voodooblab overdrive in morphology but with output buffer

Reversed by Cow4prez
