 Original Unit Courtesy of the Freestompboxes.org Online Community.
<http://freestompboxes.org>

- Notes:
- R5, R7, R8, R10, R12, R18, R20 are 1/4 watt Metal Film 1%.
 - All others are 1/4 watt Carbon Film 5%.
 - All capacitors are Panasonic. Non-polarized are ECQ series film-type.
 - Polarized are SU series standard electrolytic. (SU series polarized are discontinued. Replaced by M series.)
 - C17, C18 are 16v Electrolytic. C16 is Tantalum. All other electrolytics are 50v.
 - Potentiometers are CTS 24mm Carbon type. Custom ordered.
 - Footswitch is Carling 316P.
 - D2 & D3 are Germanium type. Voltage drop is approximately .35v.
 - In some units, R1 is a Zero Ohm Jumper!
 - This schematic traced from unit numbered, "S 698".
 - This drawing is a corrected revision of the earlier May 2008 schematic.
