

Guyatone PS-006 - Analog Echo

Traced by lolbou from unit #005059

All transistors 2SC1815 except Q7 : 2SK30A.

All diodes are small signal ones.

All capacitors ceramic except MN3101's 470p which is styroflex.

All electrolytics are "Towa" brand.

MA522 is a lambda diode made by Matsushita/Panasonic.

Thanks to Dirk_Hendrik for help and comments.
