

CAPACITORS ARE NYLAR.

NOTE: IN MANY LOCATIONS THERE ARE .1MF CAPACITORS IN PARALLEL WITH .1MF CAPACITORS. THIS WAS DONE FOR THE PURPOSE OF BEING ABLE TO SELECT THE BEST TONAL COMBINATIONS. ORIGINAL TRANSISTORS WERE LOW NOISE MEDIUM GAIN BC239A'S. LAYOUT CAN USE EITHER MPQ QUAD DIP TRANSISTOR PACKAGE OR DISCRETE THROUGH HOLE TO92 OR SOT 23 TYPE NPN DEVICES.
