
Revisions:
- ICE-9 Schematic + Text for Part values. Caps measured in circuit
- V1.0, 7Line, Added Part values to Schematic. Values in () or marked with ? are Boss DS-1 Values.
- V1.1 George Giblet 2019/08/12 Fixed typos, wrong values and connections. Added semiconductors.

C1, C2, C3 are Through-hole Electrolytics
The other caps are non-polar SMD
Most are ceramic but there may be some SMD film caps

The physical size of C7 > C8 > C13 goes against the cap value

Since caps were measured in-circuit the values cannot be considered 100% verified.

MXR Custom Badass 78 distortion

V1.1 2019/08/12
