

**Prescription  
 "Lawnbox"**

drawn by Phillip Bryant  
<http://fuzzcentral.tripod.com>

Q1, Q2, and Q3 were originally PNP Germanium devices.

- The "Lawnbox" is very similar to the SolaSound Tone Bender 3-knob except:
- The 10uF capacitor that parallels the 3.3K resistor is replaced with a 4.7uF capacitor
  - A 250K pot replaces the 220K resistor between the "Tone" and "Volume" pots
  - The 100K "Fuzz" pot is replaced with a 250K pot
